PrescribeCare

Document enhanced services, produce care plans, and exchange clinical information with the healthcare team.

As the push for enhanced services grows stronger, the role of the community pharmacist continues to expand. Providing enhanced services comes with the requirement of documenting patient encounters. With PrescribeCare, use electronic care plan templates to consistently capture patient encounters and build narrative progress notes. Data captured from patient visits is always readily retrievable for analysis. These interoperable care plans are seamlessly exchanged with other members of the healthcare team.

Capture your enhanced services with PrescribeCare:
- Reconcile medications
- Identify medication therapy issues
- Notify physicians
- Streamline documentation
- Document biometrics and labs
- Print patient care plans
- Document goals and outcomes
- Connect with other members of the healthcare team
